THUISZORG VOOR WEESKINDEREN IN KENIA

**Nieuwsbrief Kidscare september 2011**

Beste vriend van Kidscare,

Een jaar na de officiële start van Kidscare kunnen wij u berichten dat meer dan 100 wees- en hulpbehoevende kinderen intensief worden begeleid door onze Kidscare staf. Onderstaand rapport van Ali Mwaziro, de projectdirecteur willen wij jullie niet onthouden. Dankzij de financiële steun die we van onze donateurs ontvangen kan de Kidscare staf in Kenia zo succesvol opereren. Bedankt daarvoor!

Met vriendelijke groet,
Gerard en Lisette Geenen

FEITEN & ACTUEEL**Report september 2011**

Am very delighted to report that there is a good progress of the Kids care project in Kenya. The children are happy to be in school. They join other children in school. They play together, learn together and discuss issues with other children. They have new hope for life and education. When we visit them in schools, you can see their joy in the eyes and the young children always scramble just to shake hands with us.

Many people we talk to like our project. It's growing big and the challenges are how to cope with the growing number of children, all need at least attention from us. The children have developed a sense of security, they know somebody somewhere is thinking

The total of 108 children are lucky of out the many that are still not reached. The guardians have more expectations but we are guided by the principles of the project and do what we can and also they have their part to play too. The Kenya project team is so dedicated and work tirelessly to help the children to access school, health facilities and at least guide the guardians to adequately feed the children.

We also appreciate head teachers of schools we visit. They understand us quickly and accept children who were not in school to their school regardless of the background of the children.

Much regards,
Ali S. Mwaziro
Project Director, Kidscare Kenya
